DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to blending elements by calculating a ratio between alphas, classified in class 345, subclass 592.
 - II. Claims 14-20, drawn to blending elements using three different interpolation functions, classified in class 345, subclass 592.
 - III. Claims 21-33 drawn to blending elements by defining the resulting alpha instead of calculating it, classified in class 345, subclass 592.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as using 3 interpolations functions to calculate instead of a ratio. Invention III has separate utility such as defining a resulting alpha as an upper graphic element instead of performing a calculation to find the resulting alpha. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I, II, or III is not required for any of the other groups, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Tim H. Pham on September 13, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2676

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
